

Water conservation, let's make it a way of life.

Los Angeles County Waterworks Districts is dedicated to raising awareness and promoting the conservation and protection of our vital water resources.

UPDATED WATERING RESTRICTIONS AND RECOMMENDATIONS

This season's rain and snowfall have provided much-needed relief to water supplies, but next year could bring back dry conditions. With that balance in mind, LACWD has relaxed mandatory outdoor watering restrictions but encourages customers to continue conserving precious water resources. We're committed to ensuring enough water for the coming years.

Please note that **the following restrictions are still in place until further notice:**

- Watering of non-functional grass at commercial and institutional properties remains prohibited per State Governor Executive Order.
- Outdoor watering must not flow onto the street, sidewalk or gutters.
- Using potable water for decorative fountains, ponds, lakes or other similar aesthetic structures remains prohibited.
- Washing hard surfaces such as concrete sidewalks or roadways with potable water is prohibited (except for human health and safety exceptions).
- Hoses used for car washing and outdoor hand watering of plants and trees must have automatic shutoff nozzles.

From fighting fires to staying hydrated, water remains vital to everyday life. Conservation actions go a long way towards protecting our water supplies for the future (and lowering your water bill)!

For information on rebates and ways to reduce your water use, please visit LACWaterworks.org.

OUR MISSION

To provide reliable, high-quality water and responsive customer care in a cost effective, sustainable, and environmentally responsible manner.

Free Workshops

LACWD 36 (Val Verde) customers - Want to learn more about water-efficient landscaping? Santa Clarita Valley Water hosts a free monthly class on Saturdays at 9 a.m. Classes focus on topics such as:

- Harvesting your own garden
- Proper pruning
- Small space gardening, and more!

The classes are 45 minutes, followed by a Q & A session. The classes are offered in person or virtually.

If you miss a class, don't worry! All presentations are recorded and available online one week afterwards. To pre-register and learn more, visit Santa Clarita Valley Water's Landscape and Gardening Workshop website at YourSCVWater.com/landscape-workshops.

Visit YourSCVWater.com for rebate programs and other information.

MY WATERWORKS Account Manager MyWAM (lacwaterworks.org):

MyWAM allows you to manage your LA County Waterworks District account online — view your account balance, pay bills, monitor water consumption and more. Register today at dpw.lacounty.gov/mywam

Bridging the Gap: Low-Income Water Assistance Program

LACWD is leading the way in its efforts to build equity through outreach for disadvantaged communities. These efforts include the Low-Income Water Assistance Program (LIHWAP). LIHWAP is an emergency program that assists low-income families with past-due water bills (up to \$15,000). This one-time grant does not have to be repaid.

A webinar (available in English and Spanish) was hosted in June to inform customers of LIHWAP. This webinar can be viewed at pw.lacounty.gov/wwd/web/Publications/Videos.aspx

For more information on the LIHWAP, please visit Maravilla.org or contact Maravilla Foundation at (323) 721-4162 to request an application.

What is a water infrastructure?

The assets that make up Waterworks' infrastructure include: water mains, pumps, reservoirs and more. All Waterworks' infrastructure has an expected service life of approximately 40-80 years, depending on the type of infrastructure and construction materials. As the infrastructure ages, the maintenance for leaks and breaks is expected to increase. Our staff work around the clock to ensure uninterrupted safe, clean water. This include: routine maintenance, customer service, monitoring water quality, and more.

We have made substantial investments in modernizing our system, which have resulted in more efficient operations. We are implementing a comprehensive Asset Management Program to evaluate risk and prioritize investments, while re-evaluating maintenance procedures to optimize use of staffing time. Our Capital Improvement Projects for the Districts include new water mains, storage reservoirs, and pump stations. We are actively

pursuing grant funding and other means to support critical projects.

Thank you for your continued support and involvement. We are your water district, and our mission is to provide your community with safe, clean water resources.

LET US KNOW

To report water leaks or water theft, please call Los Angeles County's 24-hour Dispatch Center at **(800) 675-HELP**.

This is a quarterly publication produced by Los Angeles County Public Works to provide news, resources and information to the communities we serve in Los Angeles County.
