

Budlong Av – Manchester Av/El Segundo BI – SR2S Program

- **Project Scope:**

The primary objective of this project is to install various traffic calming features including traffic circles, bulb-outs, signage, and pavement markings. Budlong Av from Imperial Hwy to El Segundo BI will also be marked as a bike boulevard.

- **Project Benefits:**

The project seeks to provide safety improvements for cyclists and pedestrians using various traffic calming measures such as traffic circles and bulb-outs. The bulb-outs also minimize the distance pedestrians must travel to cross intersections, providing an added measure of safety.

- **Community Outreach:**

Public Works worked with a consultant to hold two community meetings to garner public input on the project. Public Works also actively sought input from first responders who provided valuable feedback. A community meeting is planned for the month prior to the start of construction to remind the public of the project and to let them know the tentative schedule for construction. A project information flyer and a pre-construction brochure will be provided just after the project is awarded and a week prior to start of construction, respectively.

- **Project Location:** Unincorporated County community of Athens.

- **Cost Estimate:**

- Total Project: \$2.4 million
- Construction Cost: \$1.2 million
- Reimbursable State Grant Funds: \$450,000

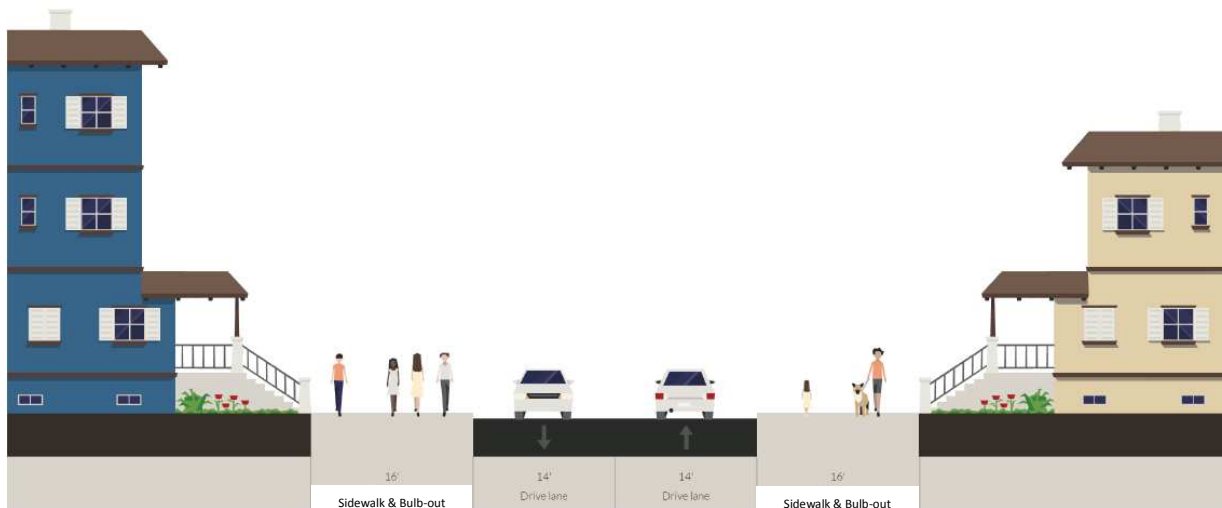

- **Economic Impact:** Project construction supports 15 direct and indirect jobs.

- **Estimated Start of Construction:** September 2017

Please email/call us with any questions about this project.

Budlong Av – Manchester Av/El Segundo BI – SR2S Program

Bulb-outs provide a landing for pedestrians and reduce the crossing distance at the corners.
