## Objective

Watershed Management Division (WMD) is a newly organized Division within the County of Los

in the planning and designing of new and innovative multiuse watershed management projects, between August 2000 and August 2002, as well as lessons learned from forming a new Division.

The Report will provide watershed management stakeholders, including other County departments, divisions within Public Works, cities and organizations within the County, and environmental agencies/committees, information that may assist in better planning and implementation of future watershed management projects.

Angeles Department of Public Works (Public Works). This new Division has encountered and overcome many unique challenges and it continues to grow from these experiences. WMD developed this first Biennial Report to document its progress. This Report outlines: Section Backgrounds, Missions, Accomplishments, Projects, Lessons Learned, and Future Plans of WMD. The Report presents this information and experiences gained
