ACKNOWLEDGEMENTS

This Master Plan provides a vision for the future of the Los Angeles River and Tujunga Wash and makes specific recommendations on how that vision can become a reality. The creation of an achievable plan of this scope requires the hard work of a dedicated team of people - the Planning Team members who have worked for years to create this plan.

In spite of their efforts, their work would have been in vain without the assistance, cooperation and input from the community and all the various agencies, cities and citizens' groups who participated in the process. The team wishes to thank them for their invaluable support.
