Water System Infrastructure Community Meetings

Los Angeles County Waterworks District No. 29, Malibu, invites you to attend one of two scoping meetings to discuss California Environmental Quality Act (CEQA) requirements for proposed water system infrastructure improvement projects in Los Angeles County Waterworks District No. 29, Malibu.

The projects addressed through these scoping meetings are of importance to the District's system operation and will help to ensure a reliable high-quality drinking water supply for its customers.

The CEQA Notice of Preparation will be available for review on our website at www.lacwaterworks.org prior to the meetings. We are seeking your input on the important environmental issues that will be addressed in the CEQA environmental assessment.
