

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES
SECTION A - CHARGES

- 3-A-1 CHARGES FOR SERVICES RENDERED: Charges shall be made for services rendered by a District for the herein described classes of services. Such collected charges shall be deposited to the credit of the applicable Fund of the District. The District reserves the right to provide the enumerated services or to require the applicant to provide the service.

All charges quoted herein are fixed for the average or normal type of service performed. An additional charge will be made and added to the fixed charge for any unusual condition encountered requiring furnishing additional materials, use of any special equipment, or requiring additional time and labor. These additional charges shall be computed on an engineering estimate of current costs and shall be paid prior to the beginning of the work or upon completion of the work and upon presentation of a billing statement for these additional charges.

- 3-A-2 INSTALL CHARGES FOR WATER METER ON EXISTING SERVICE CONNECTION:

Charges include water service application processing, engineering review of installation, meter and all necessary fittings for water service pressures up to 149 psi including customer valve.

NOTE: Charges in this rule do not include furnishing and installing of service connection from water main to meter, curb stop, and meter box.

Meter Size (in.)	Charge
3/4"	\$ 451.02
3/4" x 1"	\$ 518.42
1"	\$ 653.25
1 1/2"	\$ 1,181.31
2"	\$ 1,691.66

The charge for a meter larger than 2 inches will be determined by the District from an engineering estimate of current cost.

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

3-A-2 INSTALL CHARGES FOR WATER METER ON EXISTING SERVICE CONNECTION: (Continued)

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

3-A-2 Rev. 11/62, 10/68, 6/13/78-Sch. 53; 5/29/79-Sch. 62; Rev. 8/18/81-Sch. 66; 8/3/82-Sch. 67A, 8/2/83-Sch. 68, 8/23/83-Sch. 69, 9/6/83-Sch. 70, 9/4/84-Sch. 73, 11/6/84-Sch. 74, 8/13/85-Sch. 75, 11/26/85-Sch. 77, Rev. 7/15/93, 1/3/11, 1/3/12, 1/13, 2/14, 3/15, 1/16, 1/17, 1/18, 3/19, 2/20, 6/20, 6/21, 1/22

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

3-A-3 INSTALLATION CHARGE FOR PERMANENT SERVICE CONNECTION AND WATER METER FURNISHED BY THE DISTRICT: Charges for the District to furnish and install service connection and/or water meters with District forces, equipment, and furnished materials are established by the conditions a, c, and d, as follows:

NOTE: The charges established in this rule are based on average conditions and will be increased by the District if the conditions associated with any particular installation require installation of a service connection more than 50 feet in length (See Rule 3-A-10) or performance of extra work or furnishing of extra materials. The extra charges for such other than normal conditions will be determined by the District from an engineering estimate of current costs.

- a. Service Connection Installation Only (without water meter and for all pressures of water service 150 psi to 500 psi.): Charges include cost of water service application processing, engineering review of application, obtaining of a road excavation or highway encroachment permit, pavement removal, excavation (boring if necessary), tapping of water main, installation of piping and fittings up to and including a customer curb stop, and meter box (traffic or parkway type), backfilling, street resurfacing (temporary and permanent), and all other necessary work and materials.

Service Connection Size (in.)	Charge
1"	\$ 1,370.68
1 1/2"	\$ 1,706.15
2"	\$ 2,327.26

The charge for service connection larger than 2 inches will be determined by the District from an engineering estimate of current cost.

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

3-A-4a LOCAL SYSTEM IMPROVEMENT CHARGE, WATER SERVICE FROM AN EXISTING FRONTING WATER MAIN: (Continued)

FOR WATERWORKS DISTRICT NOS. 21, KAGEL CANYON, 29, MALIBU, 40, ANTELOPE VALLEY, AND MARINA DEL REY

Size of Water Main Inches	Range of Fire Flow Required & Available GPM		Charge per Benefited Front Foot of the Applicant's Premises
20	0	to 750	\$196.85
	751	to 1,250	\$199.62
	1,251	to 1,750	\$203.10
	1,751	to 2,250	\$209.14

	3,751	to 4,250	\$236.68
	4,251	to 5,000	\$245.33

The charges for pipe sizes or fire flows different than listed herein will be based on an engineering estimate of costs. Where the existing fronting water main has more capacity than will be needed to satisfy the domestic and fire protection service requirements of a proposed development, said development shall be responsible to pay the charge for only the Local System Improvement (frontage) Charge for the fire and domestic flow demands and the size of pipe necessary to meet said demands. The pipe diameters shall be sized to limit the maximum velocity for fire flows to 10 feet per second. For normal domestic flows the velocity should not exceed 5 feet per second.

Minimum size of pipe for any type of development shall be 6-inch-diameter.

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

- 3-A-4b LOCAL SYSTEM IMPROVEMENT CHARGE, WATER MAIN EXTENSIONS: All water main extensions shall be made at a charge to the applicant based on an engineering estimate of costs or, at the option of the District the applicant may be required to arrange the installation of the extension by a private contractor, all at the expense of applicant, including paying any applicable charges of the District. Credits may apply against the Capital Improvement Charge for the value of the offsite portion of the water main and the value of the excess capacity of the water main. At the option of the District, a Participation Letter may be accepted from the applicant and other participants pursuant to Rule 1-A-46.

NOTES TO RULE 3-A-4b

NOTE 1: If the applicant's premises has been granted a Zone Change, Zone Exception, or Conditional Use Permit for use of the property for a higher use than permitted in the original zoning, resulting in a higher water supply requirement including fire protection water service, the Engineer shall determine the applicable charges in accordance with Rule 3-A-4 and 3-A-11k. Applicable parts of Rule 1-A-49 and Rule 4-B-1 shall apply. If there is a record of how the previous requirement was set for an existing development which was developed at a lesser land use level than the existing allowed land use (zoning) and now is being redeveloped to the existing higher allowed land use (zoning) resulting in a higher water supply requirement, said premises may be subject to additional Local System Improvement and Rule 4-B-1 and applicable charges under Rule 3-A-4 and Rule 3-A-11k shall apply.

**3-A-4b LOCAL SYSTEM IMPROVEMENT CHARGE, WATER MAIN EXTENSIONS:
(Continued)**

NOTES TO RULE 3-A-4b (Continued)

NOTE 2: Length of Main Extension: The length of the water main extension, for those situations of serving parcels beyond the area presently served, shall be from the end of the existing adequate capacity water main to the farthest corner of the applicant's premises that will front on the water main. In those cases where the property to be served by the water main extension is zoned 1-acre or larger or is part of a parcel having an area of more than 1-acre, the extension shall be such length so as to serve the premises requesting service and to extend along the premises' entire benefited frontage when the parcel's overall frontage is less than 100 feet or a minimum of 100 feet. When the parcel's frontage exceeds 100 feet, the length of water main extension shall from the end of the existing adequate capacity water main to 5 feet beyond the farthest driveway or a minimum of 100 feet, whichever is greater. All main extensions shall be such that they can directly serve the entire frontage of all the premises for which Capital Improvement Charges have been paid. Charges for the frontage of applicant's premises shall be computed in accordance with Rule 3-A-4a where the premises fronts on an existing water main from which service is to be provided.

For those situations where water service is to be made available to either previously served parcels for which new Building Permits (other than accessory buildings or less than 50% rebuilding) are required or to vacant property within that area presently served, the length of the water main extension that may be required by the District to provide water service, including meeting fire protection requirements either set by local fire protection agency or as determined by District based upon published standards of fire protection agency, will be determined by District.

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

**3-A-4b LOCAL SYSTEM IMPROVEMENT CHARGE, WATER MAIN EXTENSIONS:
(Continued)**

NOTES TO RULE 3-A-4b (Continued)

NOTE 3: Adequate Capacity Water Main: An adequate capacity water main is defined as having the capacity for twice the average daily domestic demand and, for the fire protection flow set by the local fire protection agency; the flow velocity does not exceed 10 feet per second. For one way flows the water main sizes and maximum flows are as follows: 4" - 390 gpm; 6" - 875 gpm; 8"-1,600 gpm; 10"-2,400 gpm; 12"-3,600 gpm; 14"-5,000 gpm; 16"-6,250 gpm; and based on Hazen & Williams, C = 120 for new pipe and C = 100 for old pipe.

NOTE 4: Credits: The total credits allowed under Rule 3-A-4a shall not exceed the applicable Capital Improvement Charge for the applicant's premises, including premises of any participants.

NOTE 5: Off-Site Water Main Extension: Rule 3-A-4 shall only apply to the off-site water main extensions necessary to serve the water system of a development as determined by the Engineer and shall not apply to the development water system. Off-site water main extensions are defined as that portion of the proposed water main extensions between the end of the existing adequate capacity water main and the benefited frontage of the applicant's or participant's premises.

NOTE 6: Excess Capacity Credit: Excess capacity in a water main is the capacity in any water main exceeding the capacity required for a particular development to meet domestic and fire protection needs.

NOTE 7: At the option of the District a reimbursement may be entered into with the applicant pursuant to a Participation Letter pursuant to Rule 1-A-46.

Excess capacity is the cost of excess capacity and may be applied against the applicant's or participant's premises' Capital Improvement Charges.

3-A-5 CHARGES FOR RELOCATING METER: The District will move a water meter from one service connection to another existing service connection for an applicant who owns the premises at both service connections within the District for the following charges:

- a. 1-inch or smaller meter \$ 125.20
- b. 1 1/2-inch or 2-inch meter \$ 234.32
- c. Charge for moving a meter for a meter larger than 2 inches in size will be determined by the District from an engineering estimate of costs.

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

3-A-6 CHARGES FOR EXTENDING AN EXISTING SERVICE CONNECTION:
The District may extend an existing service connection with the same size pipe for the following charge:

a.	1-inch service pipe extension		
	15 feet or less in length of extension		
	\$ 531.25
	Plus for each foot of length over 15		
	feet per foot		
	\$ 36.93

3-A-7 CHARGES FOR REPLACING METER BOX: The District will replace a meter box exclusive of cover and lid if damaged by known person and charge the following amounts to the person responsible for the damage as applicable.

	In Unpaved or Unconcreted Area	In Paved or Concrete Area
a. Non-traffic box for:		
1. 3/4"x1" and 1" meter	\$88.28	\$ 274.46
2. 1 1/2" and 2" meter	\$138.02	\$ 407.67
3. The charge for replacement of a non-traffic box for a larger meter will be determined on the basis of current costs.		

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

b. Charge for traffic type box for all size meters will be determined on the basis of current costs.

PART 3 - SCHEDULE OF RATES AND CHARGES FOR ENGINEERING AND CONSTRUCTION SERVICES--SECTION A - CHARGES (continued)

3-A-11 WATER SYSTEM ENGINEERING CHARGES:

- a. For the District to prepare plans and specifications of water mains and appurtenances for installation in the District by either a developer or by the District at the expense of a developer and which facilities will become the property of the District upon completion of the installation, the charges shall be based on an engineering estimate of costs prepared by the District.

The engineering charges must be paid by the developer prior to start of plan and Specifications preparation work by the District.

The charges stated herein do not include application processing for the installation of service connections and meters with the water main. The service connection and meter installation work can only be included upon proper application and payment of the charges of Rules 3-A-11k, 4-A-1 and 4-B-1.

NOTE: Plans and specifications (eight copies) will be in a form for the developer's use in arranging for construction of water mains and appurtenances. Bidding documents and construction contract forms are not included. If needed by the developer, these letter documents and forms must be provided by the developer and inserted by him in the set of plans and specifications.

3-A-11 WATER SYSTEM ENGINEERING CHARGES: (Continued)

- b. For the District to check plans and specifications, review and process the environmental materials for the installation of water mains and appurtenances, including fire hydrant service connections in the District, which plans, specifications, and materials were prepared by an engineer retained by the developer and which facilities will become the property of the District upon completion of the installation, the charge shall be based on an engineering estimate of costs prepared by the District.
- c. For the District to inspect installation of water mains and appurtenances, including fire hydrant installations with the mains, and where the installation work is being done by a contractor retained by the developer, the developer is to pay the cost thereof pursuant to Rule 1-V-1.
- d. For the District to prepare and process plans, specifications and environmental materials for construction of waterworks facilities (other than water mains) such as fire hydrant installations only, pumping plants, and reservoirs, the charge shall be 15.0 percent of the estimated construction costs thereof subject to a minimum charge.
- e. For the District to check the plans and specifications and review and process the environmental materials for the construction of waterworks facilities (other than the water mains) such as fire hydrant installations only, pumping plants and reservoirs, which plans were prepared by an engineer retained by a developer, the charge shall be based on an engineering estimate of costs prepared by the District plus a charge of 2.1 percent of the estimated construction cost thereof.
- f. For the District to inspect the construction of waterworks facilities (other than water mains) the applicant is to pay the cost thereof pursuant to Rule 1-V-1.

3-A-24 INTERCONNECTION CHARGES: (Continued)

- a. For Interconnections Done by the Developer: The District will operate all valves, and direct and supervise the work of the developer in making the interconnection between the existing system of the District and the system installed by the developer. The private contractor shall furnish all materials and other labor to make the interconnection, including performing all resurfacing and other work necessary to produce a finished result.

For interconnection to		
1.	6-inch and smaller water main	\$234.32
For interconnection to		
2.	8-inch water main	\$316.18
For interconnection to		
3.	10-inch water main	\$436.57
For interconnection to		
4.	12-inch water main	\$518.42
For interconnection to		
5.	14-inch water main	\$593.87
For interconnection to		
6.	16-inch water main	\$674.09
For interconnection to		
7.	18-inch water main	\$831.38
8.	For interconnection to larger size mains, the charge will be determined based on an engineering determination of current costs.	

To account for the annual changes in water system construction costs, the Director of Public Works will review the above charges annually before January 1 and adjust these charges by the percentage movement between the previous year and current year of the Construction Cost Index for the Los Angeles Region as published by the Engineering News Record.

- 3-A-27 DAMAGE OF WATERWORKS DISTRICT PROPERTY OR FACILITIES:
When the District property or facilities have been damaged by known persons, the District is to render a Damage Claim Invoice to those parties which is to include the repair cost for materials used, water wasted, labor expense, vehicle, equipment, and tool usage, and vehicle and equipment mileage charges. In addition, as part of the Invoice, the District is to charge an Invoice Preparation Charge as follows:

Damage Cost:	Invoice Charge
\$500 or less.....	\$31.00

Each \$500 or increment thereof of
additional damage.....\$31.00

and a Tool Allowance as follows:

Five (5%) percent of labor charges or a minimum of
whichever is a larger amount.....\$29.00

For Invoices unpaid after 30 days the District may add interest on the unpaid balance at that rate of 1% per each month, or 12% per year.

Minimum charge for Damaging Meter,
Meter Lock or Seal, Curb Stop or Valve.....\$22.00

Should the party that caused the damage be a customer of a District and not pay the damage bill within the time allowed, then the District may proceed with standard shutoff procedures to collect the unpaid bill.

Minimum amount to be charged for tampering or
damaging any facilities of the District other
than a water meter, meter lock or seal, curb
stop, or valve.....\$105.00
