

**LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS**

BENCH MARK LIST

GARDENA QUAD

NGVD 29 DATUM

1994 ADJUSTMENT

PREFACE

The Department of Public Works level net is composed of more than 1,700 miles of levels supporting in excess of 9,000 bench marks. Previously when a major readjustment of the net was undertaken, to emphasize the complete break with previous elevations, the CY, CG, & CL, series bench marks were re-labeled DY, DG, & DL, respectively.

Beginning in 1993 the baseline readjustment year will be indicated on baseline BM,s only indicated below (*). Henceforth all BM numbers will be labeled as a Y, G, or L, series that will no longer indicate the major adjustment year.

To facilitate the adjustment, indexing and distribution of adjusted values of the net, the county territory was divided into 33 quads or areas. For the identification purposes each quad was given a name, viz., "Rosemead," "La Mirada," "Santa Fe," etc. When bench marks and elevations in these quads are used, the name must be included in the bench mark description, e.g.,

* BASELINE 295.461 L&BR IN CTR OF CB RET @ NE COR Y 9191
(1990) LA HABRA BLVD & VALLEY HOME AVE
35FT N & 35FT E/O C/L INT

It is expected that this general adjustment will for the most part remain sound for 8 to 12 years. Updating constrained adjustments will continue in the future. When a quad is readjusted, new elevations will be published and the date of readjustment will be noted in the bench mark description. Two bench marks with different adjustment dates will not normally agree with each other.

The basic accuracy of the net is reflected by an indicated field probable error of plus or minus 0.012 foot per mile of leveling as determined from the conditions of closure. However, many years of experience in vertical control in the greater Los Angeles basin and Antelope Valley indicate that because of varying degrees of subsidence and heaving, the true datum is recovered only by obtaining substantial agreement of a number of bench marks.

The users of this net are invited to assist in its maintenance by notifying this department of cases of obliteration, apparent mistakes in description or elevations, and proven disturbance of bench marks.

=====

DATUM: U.S. Coast and Geodetic Survey Sea Level Datum
of 1929, through the medium of the Los Angeles
County Engineer Precise Level Net.
